PROFILE

I've been building and selling digital products since 2019, when I started T1GER Scripts as a hobby project that has since grown into a real business. My strength is combining design, user insight and code, and taking a product all the way from idea to launch and support. I'm now specialising in front-end development at IBA Kolding and looking for an internship in spring 2027, where I can contribute to and learn from an experienced team.

EXPERIENCE

Founder & Developer
10/2019 – present

T1GER Scripts

- Develop FiveM scripts in Lua with SQL databases and Vue interfaces. 27 releases in total and 5,400+ sales via Tebex since 2021.
- Built a reusable release pipeline in GitHub Actions that builds the UI and publishes encrypted and source-available releases across all my script repositories.
- Built a tool in React and Express that publishes changelogs to Discord through a bot, with a live preview.
- Designed and developed the webshop in Nuxt and TypeScript, using the Tebex API and an embedded checkout flow.
- Write the documentation on GitBook: features, installation, guides and exports.
- Run a Discord community of 6,700+ members and provide customer support via chat, calls and screen sharing.
- Produce product showcase videos for YouTube with more than 1 million views in total.

Webshop Product Manager
11/2013 – 01/2017

legeland.dk, Horsens

Created and maintained product pages in the webshop, including titles, descriptions, images and SEO copy.
